UPDATED OCTOBER 2026

Aafaq Ali

Senior AOSP & Android Systems Engineer

Islamabad, Pakistan · aafaq@msn.com · +92 312 3713004

aafaq.com.pk · github.com/AafaaqAli · linkedin.com/in/aafaqali

Senior Android and AOSP systems engineer. I ship product Android applications, custom ROMs, device management, and the CI/CD path around them. Platform work includes CTS, hardware-backed attestation, eSIM, and Android on POS and embedded devices.

EXPERIENCE

Senior AOSP & Android Systems Engineer · BrightByte

CosmoTogether · March 2025 – Present · Hybrid · Islamabad

- Turn a hardware change into a signed watch update a customer can install, instead of a one-off build.
- OS CI/CD: automated builds, artifact signing, versioning, and staged OTA rollouts so a bad update does not hit every device at once.
- Gerrit checks tied to Jira, Confluence, and Slack, so a field issue can be followed to the build that fixed it.
- Framework changes that keep device rules in the OS, where deleting an app cannot turn them off.

Senior AOSP Engineer · Senifone

October 2023 – October 2026 · Remote · Netherlands · Contract

- Three-year remote contract from Islamabad for a senior-phone fleet in the Netherlands.
- Moved a senior-phone fleet off a traditional MDM onto a LineageOS ROM Senifone controls, so support no longer waited on a vendor.

- Android 10 to 13 upgrades kept phones already in homes supported. Signed OTAs and overlay builds shipped a fix without a site visit.

Senior Android Consultant · DubizzleLabs

April 2026 – October 2026 · Remote · Contract

- Remote contract on device mobility: custom ROM, device enrollment, and the flows around them.
- Refined enrollment so operations can set up a phone and push camera, Wi-Fi, Bluetooth, and app policy without a manual pass on each handset. Admin portal packaged in Docker.

Senior Android Engineer · VentureDive

CXApp · October 2023 – March 2025 · Remote

- Led Android delivery for a multi-tenant workplace platform used by large enterprise clients.
- Cut UAT cycles by 25% through CI/CD and release-process changes.
- Integrated Okta, Intune, WSO2, and SAML. Mentored engineers across releases.

Senior Android Engineer · CEBS

Matas · September 2022 – October 2023 · Hybrid · Islamabad

- Core contributor to Club Matas, a retail loyalty app with 100K+ installs.
- Raised deployment speed by 15% with GitHub Actions for UAT and internal tracks.
- Rebuilt tracking and analytics. Held a 99.5% crash-free session rate.

Senior Android & AOSP Engineer · LEED · Techless

Wisephone / WiseOS · December 2020 – September 2022 · Onsite

- System apps and a LineageOS-based OS for a minimalist phone sold to families in the US.
- Moved device management from BYOD to a controlled custom ROM.
- Device Policy Manager at the framework level, with firmware changes matched to the hardware.

Android Engineer · CUBICODES

August 2020 – December 2020 · Onsite · Islamabad

- Published utility apps with 10,000+ installs and migrated legacy projects to Kotlin.

Android Engineer · GrithX Solutions

September 2019 – August 2020 · Hybrid · Islamabad

- Patari (100K+ installs): Java to Kotlin, search efficiency up about 30%, Spring Boot APIs.

Freelance software engineer · Upwork

September 2018 – July 2020 · Islamabad

- AOSP consulting, EMDK, wearable integrations, and IoT Android controllers.

Open source

github.com/AafaaqAli · since January 2017

- PeanutButter, a self-hosted media catalog with a desktop client and a native Android TV app.
- MQTT services, Android Wear utilities, and Linux companion-app work including eXtern OS.

SELECTED PROJECTS

PeanutButter

github.com/PeanutButterOrg/PeanutButter

- Self-hosted catalog for media you own. Rust API, Flutter desktop client, and a native Android TV app.

Senifone · remote AOSP fleet, Netherlands

October 2023 – October 2026 · senifone.co.uk

- Company-controlled LineageOS ROM, Android 10 to 13, signed OTAs. Remote contract.

CodeOS & CryptOS

Private GrapheneOS-based distributions

- Hardened builds, a system application suite, a management portal, and automated firmware releases.

CXApp · Club Matas · WiseOS · Patari

See the roles above for scope and results.

SKILLS

Android applications

Kotlin, Java, Jetpack Compose, Coroutines, Hilt, Room, Retrofit, MVVM, MVI, Clean Architecture.

AOSP and firmware

Framework customization, LineageOS, GrapheneOS, hardware bring-up, Device Policy Manager, MDM, overlay builds, OTA, Gerrit.

Compliance and embedded

CTS, hardware-backed attestation, eSIM, POS and embedded Android. GitHub Actions, GitLab CI, Jenkins, Docker, AWS, Azure.

Languages

English, Urdu.

EDUCATION

Bachelor of Computer Science, Preston University, Islamabad. 2016 – 2020.

Intermediate, Pre-Engineering, Ghazi University. 2013 – 2016.

Matriculation, GCHHS. 2010 – 2012.

RECOGNITION

- ICPC regional, 3rd place.
- INNOVATIA 19, Android application development, runner-up. COMSATS.
- INNOVATIA 19, speed programming, runner-up. COMSATS.
- PSDF software development certification.
- Highest scorer, English Linguistic Program, July 2024.
